HOW WE WORK

Team alchemy

- **We have complete competence in the entire software life cycle**
- We value process more than hard skills
- We support the methodology through tools: engineering tools and AI
- We value individual productivity
- We share know-how and knowledge
- We have expertise in specific areas of business and technology
- We maintain our profiles for quick responses to customer inquiries
- **We maintain technological neutrality**

FROM OFFER TO OPERATION

Our development methodology and tools

Offer · Agreement
1ST PHASE · START

Document management
Project and legal documents

Scrum sprinting
2ND PHASE · FROM KICK-OFF TO GO-LIVE

Issue tracking
Time and task management (YouTrack)

Development wiki
Technical documents

Quality tool
Code reviews (SonarQube)

Single source of truth
Libraries, containers

Version control
Source code, infrastructure code

Communication
Faster reactions

Development environment
JetBrains tools with AI assistants

Integration and delivery
Deployable artifacts (TeamCity)

Product delivery
3RD PHASE · GO-LIVE

Runtime environment
On-premise: Docker, Kubernetes. Cloud: Azure, AWS, Google Cloud. High availability.

Operations
ON DEMAND

Maintenance and support
Monitoring and updates
